

Care Within Reach

TAKE YOUR BEST SHOT!

IF YOU THINK...

- the pandemic over; *it's not.*
- it's not serious; *it is.*
- if you've had COVID-19, you are immune; *you're not.*
- it won't affect your child; *it can.*
- the vaccine can give you COVID-19; *no it can't.*
- the vaccine has safety concerns during pregnancy or breastfeeding; *no it doesn't.*

***Covid-19 is STILL here. Get the facts.
Protect yourself and your loved ones by
taking your best shot.***

Norwalk Community Health Center

120 Connecticut Avenue • Norwalk, CT 06854

The Covid-19 Pandemic Is Not Over.

GET THE FACTS:

- COVID-19 vaccines are safe and effective.
- People 6 months and older are recommended to stay up-to-date with COVID-19 vaccines, including getting boosters, if eligible.
- Those who had COVID-19 and do not get vaccinated after recovery are more likely to get COVID-19 again than those who get vaccinated after recovery.
- If you are pregnant or were recently pregnant, you are more likely to get severely ill from COVID-19 compared to people who are not pregnant. Pregnancy causes changes in the body making it easier to get very sick. Evidence suggests that the vaccine causes no risk to the unborn baby.
